

PRAVEEN K

SOC Analyst | Junior Threat Intelligence Analyst | Cybersecurity Analyst

+91822-0189-476 | k.praveen4234@gmail.com | Linkedin : <https://www.linkedin.com/in/viewpraveenk/>

PROFESSIONAL SUMMARY

Entry-level Cybersecurity Professional with a strong foundation in network security, threat detection, vulnerability assessment, security monitoring, and risk management. Hands-on experience in developing security-focused projects, including Intrusion Detection Systems (IDS) and network traffic analysis solutions using Python. Skilled in analyzing security events, identifying vulnerabilities, investigating potential threats, and recommending effective security controls to mitigate risks. Possesses a solid understanding of networking concepts, cybersecurity principles, incident response processes, and security best practices. Demonstrates strong analytical, problem-solving, and technical skills with the ability to work effectively in dynamic environments. Passionate about helping organizations strengthen their security posture through proactive risk management, continuous learning, and the application of industry-standard security methodologies and tools. Seeking an opportunity to contribute to Security Operations, Cybersecurity Analysis, or Security Consulting teams while further developing expertise in information security.

TECHNICAL SKILLS

SIEM & Monitoring : Splunk (log monitoring, alert triage, SIEM basics), Security Event Monitoring, Log Analysis, Alert Investigation

Security Tools : Wireshark, Nmap, Burp Suite, Nessus, Metasploit, Kali Linux

Threat Detection & Response : Intrusion Detection/Prevention Systems, Incident Response, Threat Hunting, Malware Analysis, Vulnerability Assessment, Penetration Testing

Frameworks & Standards : MITRE ATT&CK Framework, Cyber Kill Chain, OWASP Top 10, NIST Cybersecurity Framework (awareness), IAM Fundamentals

Networking & Protocols : TCP/IP, DNS, HTTP/HTTPS, VPN, Firewalls, Packet Analysis, Network Scanning, ARP, DHCP

OS & Platforms : Kali Linux, Windows Security, Linux CLI, Virtual Lab Environments

Programming & Scripting : Python (security scripting, automation), Bash/Shell Scripting, PowerShell (basics)

Concepts : Threat Intelligence, IOC Analysis, False Positive Reduction, Encryption (AES-256), Steganography, PCAP Analysis

EDUCATION

B.E. Computer Science and Engineering

St.Michael College of Engineering and Technology - Sivagangai

2022- 2026

PROJECTS

Praxion – USB Malware Scanner & Cleaner

Tech Stack : Python, YARA, PE File Analysis, VirusTotal API, ssdeep

- Built a cross-platform USB threat detection tool using YARA rule matching, heuristic scanning, behavior analysis, and PE inspection.
- Implemented real-time auto-scan on USB plug-in with secure quarantine system and forensic-grade logging.
- Integrated VirusTotal API and ssdeep fuzzy hashing for enhanced threat intelligence with zero-configuration setup.

Pherion – AI based IDS & SELF HEALING

Tech Stack : Python, Scapy, Scikit-learn, Pandas, SQLite, JSON

- Developed a Python-based IDS and SOC monitoring platform with 37+ attack detection rules mapped to MITRE ATT&CK framework.
- Integrated ML-powered anomaly detection with auto-tuning thresholds covering SYN Flood, ARP Spoofing, DNS Tunneling, SQL Injection, C2 Beacons, and SMB Lateral Movement.
- Produced SIEM-ready JSON logs and PCAP export for Wireshark forensic analysis and SOC workflow integration.

Phantom – Steganography & Cryptography Security Tool

Tech Stack : Python, AES-256 Encryption, LSB Steganography, ZLIB

- Built a data concealment tool combining LSB steganography with AES-256 encryption to hide files inside ordinary images.
- Implemented multi-layer security using Password + Salt + IV with automatic ZLIB compression and lossless PNG output.

Home Lab – Security Analyst Simulation Environment

Tech Stack : VirtualBox, Kali Linux, Windows Server, Splunk, Wireshark, Nmap

- Built a personal SOC home lab using VirtualBox with segmented attacker and victim VMs to simulate real-world threat scenarios.
- Configured Splunk as a SIEM to ingest and monitor Windows Event Logs, detecting brute-force, failed logins, and privilege escalation attempts.
- Executed controlled attacks (port scans, phishing simulation, lateral movement) and performed LI analyst triage – identifying, investigating, and escalating alerts.
- Analyzed PCAP files in Wireshark to trace attack paths and document incident timelines following basic IR procedures.
- Created custom Splunk alert rules and dashboards to monitor network anomalies and reduce false positive noise.

HANDS-ON TRAINING & INTERNSHIP

Hackup Technology pvt.Ltd – Cybersecurity Internship (1 Month)

- Performed web application security testing using Burp Suite; identified SQLi, XSS, and IDOR vulnerabilities mapped to OWASP Top 10Used Kali Linux in virtual lab environments for security testing.
- Analyzed network traffic and detected suspicious packets/IOCs using Wireshark in lab environments.
- Conducted network scanning and service enumeration using Nmap to identify open ports and attack surfaces.
- Executed controlled exploitation using Metasploit on vulnerable lab machines; documented findings and remediation steps.
- Operated Kali Linux for ethical hacking tasks including privilege escalation and post-exploitation analysis.

Vital Skills × Techkriti – IIT Kanpur - Ethical Hacking & Network Security Internship (1 Mounth)

- Practiced reconnaissance, scanning, exploitation, and post-exploitation phases aligned with the Cyber Kill Chain.Gained practical exposure to penetration testing techniques and real-world attack simulation scenarios.
- Simulated MITM, brute-force, and network sniffing attacks to understand attacker TTPs and defensive controls.Worked with Kali Linux, Nmap, Burp Suite, and Wireshark in simulated security environments.
- Performed vulnerability assessments using Nmap and Burp Suite; produced risk-rated reports with remediation notes.
- Analyzed PCAP files in Wireshark to trace attack paths and reconstruct network intrusion events.
- Studied defensive strategies including firewall rule analysis, IDS/IPS alert interpretation, and network segmentation.

CERTIFICATIONS

- Cisco Networking Academy – Ethical Hacker
- Cisco Networking Academy – Network Defence
- Fortinet Training Institute – NSE 3 – Associate in Cybersecurity
- Infosys Springboard – IoT & Electronics

SOFT SKILLS

• Analytical Thinking • Methodical Problem-Solving • Pattern Recognition • Attention to Detail • Team Collaboration
• Technical Communication • Adaptability • Continuous Learning
